

NORWAY

LAND OF SCENIC WONDERS

Norway, a global energy powerhouse. While Norway is often associated with oil and gas, it is actually a world leader in the 'Green Transition.' Today, we will explore the strategic energy and trade partnership between India and Norway, which reached a historic milestone in late 2025."

LATEST POLITICAL INVOLVEMENT

ABOUT NORWAY

- Norway is not just a country; it's a \$1.6 Trillion financial empire.
- Current trade is \$1.2 Billion, but that is just the warmup.
- They export fossil fuels for massive wealth, but run their own country on 95% green hydropower.
- Norway supplies 30% of Europe's gas, giving them total geopolitical immunity.

POLITICAL LANDMARK

Politically, 2026 has been a landmark year. In February 2026, the 12th Foreign Office Consultations were held in Oslo. The key takeaway was that energy is no longer just a trade item; it's now a security alliance. Norway has been a vocal supporter of India's permanent seat at the UN Security Council, as stated by their officials at the Raisina Dialogue in March 2026. This political trust is the foundation for our multi-billion dollar energy deals.

TEPA DEAL

TRADE AND ECONOMIC PARTNERSHIP DEAL

- The India-EFTA Trade and Economic Partnership Agreement (TEPA) became active on October 1, 2025, marking a shift in trade relations.
 - Norway and EFTA partners committed \$100 billion investment into India over 15 years, focusing on growth and long-term strategic collaboration.
 - A portion of this investment targets India's Green Hydrogen mission and renewable infrastructure, strengthening energy capacity and reducing carbon dependence.
-
- As of early 2026, imports from Norway surged by 40%, driven by petroleum products and high-tech components for energy grids.
 - TEPA represents a shift from developmental aid to peer-to-peer economic alliance, strengthening political and economic ties between India and Norway.
 - The agreement includes binding commitments to generate one million direct jobs, Norway diversify supply chains away from China toward India.

STRATEGIC ENERGY POLICIES

GREEN & BLUE ECONOMY

- Norway and India are working together not just in oil, but to build a clean energy future.
- Both countries formed a Green Hydrogen Task Force to make India a global hydrogen hub by 2030.
- India is developing offshore wind farms using Norway's experience from the North Sea energy projects.
- Wind energy policies are being planned for coastal regions like Gujarat and Tamil Nadu.
- They are creating Green Shipping Corridors to transport energy using ships that produce zero emissions.
- The SAEL project converts crop stubble into electricity, helping reduce pollution and solve North India smog issues.

FUNDING THE FUTURE

\$1.7 TRILLION GPFG

- Norway's Government Pension Fund Global exceeds \$1.7 trillion, increasingly investing in India's ESG-focused emerging markets.
- Both countries formed a Green Hydrogen Task Force to make India a global hydrogen hub by 2030.
- Norway's climate funds support large-scale renewable infrastructure, reducing reliance on high-interest debt for Indian developers.
- Eksfin provides guarantees, lowering risk premiums for Indian projects using Norwegian energy technologies.
- Norway invests in rupee-denominated green bonds, stabilizing currency while funding India's renewable energy transmission projects.

DIGITAL & STRATEGIC SOVEREIGNTY

AMRIT KAAL

- Norway helps India stay energy secure by supplying stable natural gas and reducing oil dependency.
- India aims to increase natural gas use to 15% for cleaner and reliable energy growth.
- India and Norway collaborate on AI smart grids and semiconductor manufacturing for advanced technology.
- Arctic research at Himadri station helps predict monsoons, supporting India's agriculture and food security.
- The \$100 billion TEPA deal promotes local manufacturing and creates around 1 million jobs in India.
- This partnership combines Norwegian investment and Indian talent to lead future green energy innovations.

THANK YOU

Partnering for a sustainable, tech-driven future.
